

## Environmental Policy

Saftronics Limited believes that meeting the needs of the present should not compromise the ability of future generations to meet their own needs.

Saftronics will carry out periodic reviews of our organisational context to determine our position in relation to this policy statement.

In line with our commitment to continual improvement, we are committed to protecting the environment which includes: complying with all applicable statutory and regulatory requirements, prevention of pollution and mitigating our environmental impacts on climate change. As well as our specific commitments, we shall periodically review our aspects to evaluate and mitigate any negative environmental impacts.

We shall periodically evaluate and monitor our environmental performance via aspects and impacts review; Safety, Health and Environment inspection tours; systems meetings and results of first, second and third party audits.

When establishing and reviewing our objectives, we shall consider the legal and other requirements, our significant environmental aspects, risks and opportunities, our technological options and our financial, operational and business requirements, as well as the views of interested parties.

At Saftronics our environmental activities include:

- Review of our policy statement at least annually to monitor our progress
- Establish, implement and maintain documented environmental objectives in line with this policy that are undertaken at Management Review
- Regular evaluations of our environmental performance in all areas of our business
- Ensuring we meet and comply with all applicable legal and other requirements relating to environmental issues
- Using the waste hierarchy as follows: prevention – preparing for re-use – recycling – other recovery – disposal
- Listening and taking note of the views of all interested parties
- Encouraging, motivating and training all our staff to play a full part in minimising our environmental impact
- Using video-conferencing wherever possible to reduce travel
- Using only fuel efficient vehicles

Ultimate responsibility for this Environmental Policy lies with the Managing Director. However, the continuing success of Saftronics depends upon everyone working as a team to enhance our performance.

Mark C Godfrey, Managing Director
